

Double travel hammock

Colibri fuchsia CLH20-7

Just like its feathered namesake from the world of birds, LA SIESTA travel hammock Colibri is tiny, very colourful and extremely lightweight. It is made of breathable parachute silk (nylon trilobal) which is soft to the touch. Parachute silk is a particularly lightweight and space-saving material, making it the number one choice of travellers. Colibri is extremely lightweight, space-saving and the overall weight including the suspension solution is a lean 860 g. The integrated suspension solution EasyAdjust includes 2 polyester ropes (3 m

each) and two ultralight, UV-resistant hooks made of glass fibre reinforced polyamide. EasyAdjust allows swift suspension and demounting of your hammock. With EasyAdjust, the flexible LA SIESTA suspension solution, you will find there is a multitude of options for suspending your hammock – tree trunks are as suitable as rocks or a ship's rail. The loops attached to the fabric are perfect for your toilet bag or your drink. Colibri can also be turned into a blanket.

Double travel hammock **Colibri fuchsia** CLH20-7

Ultralight parachute silk

Parachute silk is made of nylon trilobal, which provides an exceptionally soft surface, is ultralight and at the same time extremely robust. It is also fast-drying and breathable. Thanks to those characteristics, this fabric is perfect for travel utensils like our COLIBRI travel hammock.

Integrated suspension

The integrated suspension solution EasyAdjust allows swift suspension and demounting of your hammock. The system includes two polyester ropes (3 m each) and two weatherproof SmartHooks made of glass fibre reinforced polyamide.
